

## ENVIRONMENTAL POLICY

06 January 2019

Oiltech Bearings is committed to continually reduce and prevent pollution, in all forms to the environment that is caused directly or indirectly by its operations.

When considering the impact of Oiltech Bearings on the environment the key areas of focus are categorised into the as follows:

- Energy consumption
- Solid and liquid hazardous waste
- Airborne pollution
- Physical waste streams
- Process efficiency
- Travel, freight and logistics
- Supply chain

In some of these areas there are local, national and international legal requirements to which the company must adhere. These will be respected and enforced at all times. The company will ensure as far as reasonably possible to ensure any changes in these requirements are identified and implemented.

On an annual basis all objectives, targets and measures will be reviewed by the company and this policy will be maintained within the company premises and on its website.
